

FARHAN AAQIL DURRANI

AI/ML Engineer · LLM Agents & LangChain · Model Deployment · FastAPI

Mahbubnagar, Telangana | fadurrani543@gmail.com | +91-6300825009 | github.com/FarhanAaqil | linkedin.com/in/farhan-aaqil-4730432bb

PROFESSIONAL SUMMARY

AI/ML Engineer specialising in LLM agent development, LangChain pipelines, and scalable model deployment. Anthropic-certified practitioner with internship experience at Jala Academy delivering end-to-end ML systems and REST API integration via FastAPI. Skilled in data pipelines, model training, and cloud deployment on AWS/GCP. Published researcher in ML-based healthcare. Holds 4 Anthropic certifications including Building with the Claude API and Introduction to Agent Skills. Seeking remote AI/ML or agent engineering roles where I can ship production-grade intelligent systems.

EDUCATION

B.Tech — Artificial Intelligence & Machine Learning 2023 – 2027

Jayaprakash Narayan College of Engineering, Mahbubnagar

- Relevant coursework: Machine Learning, Deep Learning, NLP, Computer Vision, Data Structures, DBMS
- Published peer-reviewed research paper during 2nd year on ML-based diabetes prediction

Intermediate (MPC) — Prathibha Junior College 2020 – 2022 | 82%

SSC — Jamia Darul Huda High School 2020 | 10/10 GPA

EXPERIENCE

Python Full Stack Developer & AIML Intern Sep 2025 – Nov 2025

Jala Academy — Remote

- Designed and delivered end-to-end ML projects covering data preprocessing, model training, evaluation, and deployment using Python and scikit-learn
- Took ownership of project management responsibilities — coordinating timelines, tracking deliverables, and communicating progress across a team of trainees
- Contributed to full-stack development tasks using Python backend frameworks alongside frontend integration, bridging ML capabilities with user-facing interfaces
- Mentored and guided junior trainees through AIML concepts and practical coding exercises, reinforcing own understanding through teaching

TECHNICAL SKILLS

AI / ML	PyTorch, TensorFlow, scikit-learn, LangChain, Hugging Face Transformers, FAISS, ChromaDB
Agents & LLMs	LLM Agent Pipelines, Tool Use, RAG, ReAct Framework, Anthropic Claude API, OpenAI API
MLOps & Deploy	Model Deployment, FastAPI, REST API Design, Data Pipelines, Docker, CI/CD (GitHub Actions)
Data Science	Pandas, NumPy, Matplotlib, Seaborn, Plotly, Time-Series Analysis, Statistical Modelling
Backend	Python, Flask, Node.js, Express.js, RESTful APIs, Google Sheets API
Frontend	React, Redux, TailwindCSS, HTML/CSS, JavaScript
Databases	MongoDB, MySQL, Vector Databases (FAISS / Chroma)
Cloud & Tools	AWS, GCP, Git/GitHub, Figma, Arduino, Raspberry Pi
Languages	Python, JavaScript, Java, C++, C

PROJECTS

InterviewPro — AI-Powered Interview Preparation Platform | [JavaScript](#) · [React](#) · [Claude API](#) · [Node.js](#)

- Built an AI interview coach using the Claude API that generates role-specific questions and delivers real-time feedback on answers, improving candidate response quality through iterative practice
- Designed and deployed a REST API backend with session persistence, enabling users to track performance across multiple practice rounds and measure improvement over time
- Implemented a responsive React frontend with dynamic question rendering and AI scoring — reducing interview preparation time by providing instant structured feedback

SheetSense AI — Conversational AI Agent over Live Spreadsheet Data | [Python](#) · [LangChain](#) · [Google Sheets API](#) · [FastAPI](#)

- Designed and deployed a LangChain agent with tool-calling and multi-step reasoning that eliminates manual spreadsheet querying — users retrieve and update live Google Sheets data through plain English commands
- Built a FastAPI model deployment layer exposing the agent as a REST API, enabling integration into any frontend or third-party workflow with a single endpoint
- Reduced data access friction for non-technical users by removing the need for SQL or formula knowledge entirely

IntelliGlove — Gesture-Controlled Human-Computer Interface | [Python](#) · [Arduino](#) · [Raspberry Pi](#) · [OpenCV](#) · [Sensor Fusion](#)

- Engineered a wearable smart glove fusing flex sensors, IMU data, and computer vision — enabling touchless PC control with sub-80ms end-to-end latency
- Built and deployed a Python ML classifier on Raspberry Pi achieving 94%+ gesture recognition accuracy across 12 classes, with real-time serial communication to Arduino for low-latency input injection
- Demonstrated hardware-software co-design skills rare at undergraduate level — bridging embedded systems with deployed ML models

Student Tracker — AI-Powered Academic Management Platform | [Python](#) · [ML](#) · [Node.js](#) · [Express.js](#) · [MongoDB](#) · [JavaScript](#)

- Built a full-stack platform with an embedded AI assistant that delivers personalised academic recommendations based on student performance trends
- Integrated an intelligent task manager that predicts deadline risk and re-prioritises workloads automatically using ML-based scheduling logic

DiaPredict AI — Diabetes Risk Detection System | [Python](#) · [scikit-learn](#) · [FastAPI](#) · [Pandas](#)

- Trained an ensemble classifier (Logistic Regression + Decision Tree + Random Forest) on the PIMA dataset achieving 82% accuracy; deployed via FastAPI with full inference pipeline
- Research based on this project published in Journal of Advancement in Parallel Computing, Vol. 08, Issue 02 (2025) — HBRP Publication

Stock Market Prediction Pipeline | [Python](#) · [Pandas](#) · [scikit-learn](#) · [ARIMA](#)

- Built an end-to-end forecasting pipeline combining regression models and ARIMA time-series analysis on 5+ years of OHLCV data, achieving 92% directional accuracy on held-out test set
- Incorporated rolling window features, lag variables, and RSI momentum indicators with automated visualisation reports

RESEARCH PUBLICATION

Diabetes Prediction System Using Machine Learning

Journal of Advancement in Parallel Computing, Vol. 08, Issue 02 | HBRP Publication Pvt. Ltd. | 2025

- Demonstrates ensemble ML for early-stage diabetes risk classification with focus on clinical interpretability and feature importance analysis

CERTIFICATIONS

- **Anthropic** — Introduction to Agent Skills
- **Anthropic** — Building with the Claude API
- **Anthropic** — AI Fluency: Framework & Foundations
- **Anthropic** — AI Fluency for Students

- **Apna College** — Full Stack Web Development
- **NPTEL (IIT)** — Database Management Systems (DBMS)
- **SkillUp** — Python for Data Analysis
- **SkillUp** — C++ Programming
